Officials said the cut was the only alternative to a receivership.

Twenty-five American and Canadian operators voted to strike in sympathy with the trainmen. Enough remain to insure operation of mail cars. The company is advertising for strike-breakers. Tramway officials said they hoped to operate by afternoon and restore normal service tomorrow.

BOMB WRECKS MINING OFFICE

(By Associated Press.)
PITTSBURGH, Mont., July 6.—An explosion of dynamite placed in the entrance of the Anaconda Copper Mining company's pay office damaged that and surrounding buildings in the heart of Butte's business district at about 4 o'clock Sunday. A heavy iron grating blown against the building opposite narrowly missed a street car heavily loaded with miners. The property loss will not exceed \$5000, Anaconda officials said. Windows of a half a dozen stores were blown out but the damage brought by the police to have been probably a dozen sticks of dynamite, was not properly placed to do great damage to the brick and reinforced concrete one-story structure. The pay office was recently completed and was an annex to the three-story engineering and timekeeper's office and is a block north of the company's administrative building. It is diagonally across the street from the Western Federation of Miners' hall, which was dynamited in 1914 during a factional union controversy. The police have made three arrests for investigation. No theory as to the cause of the explosion has been advanced by Anaconda officials.
